This activity and the clipart used for this activity are created by [Little bumble-bees class Teaching Resources | Teachers Pay Teachers](#).

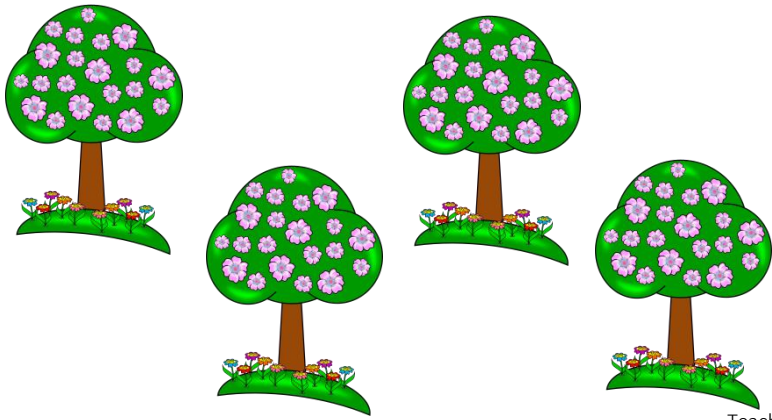

Inspired by the Spring arrival, we created this fun counting activity. This Spring Count and Clip Cards packet is perfect for your spring math center, morning bins, Teach stations for students with ASD, and individual practice. Spring Count and Clip Cards enhance counting and number recognition skills in Pre-K, Kindergarten, and Special education.

Students will use their counting skills to practice math and work on their fine motor skills simultaneously. The students will count the items on each card, find the correct number, and clip a clothespin to the numeral that shows how many. Instead of clothespins, students can also use paperclips or a dry erase marker. Have fun using this activity with your students, and make sure you check the activities that we have in our archive.

You will also find manipulatives, numbers, and math symbols cards at the end of the clip cards pack. Use them to create interactive activities for your students.

For activities in English, check the English activities category that is displayed at the top of the blog's home page.
